

Interdisciplinary Research

Abstract Checklist

Content & Coverage

- ☐ **Background/Context:** Does the abstract clearly set up the research topic or problem?
- ☐ **Research Question:** Is the main aim or question of the research stated?
- ☐ **Reason:** Is it clear why it is important to answer the question of the research?
- ☐ **Methods:** Are the methods or approach briefly and clearly described?
- ☐ **Results/Findings:** Are key findings summarized (even if preliminary)?
- ☐ **Conclusion/Implications:** Does the abstract explain the significance or impact of the research?

Clarity & Readability

- ☐ **Concise Language:** Is the abstract free of unnecessary words or jargon?
- ☐ **Logical Flow:** Do ideas progress in a clear and logical order?
- ☐ **Audience Awareness:** Is the abstract appropriate for its intended audience (e.g., an interdisciplinary publication)?
- ☐ **Key concepts:** Are the key theoretical concepts or frameworks clearly explained for readers unfamiliar with them?

Specificity & Precision

- ☐ **Specific Details:** Are the claims and findings specific rather than vague?
- ☐ **Avoids Generalizations:** Does the abstract avoid broad or unsupported statements?
- ☐ **Keywords:** Does the abstract include search terms you would use in your own research?

Structure & Format

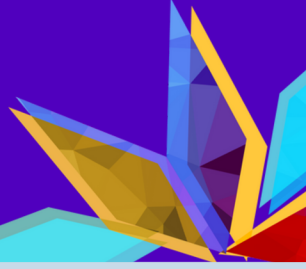

- ☐ **Length:** Is the abstract within the required word limit?
- ☐ **Style:** Does it follow the conventions of the field (e.g., tense, voice)?
- ☐ **Title Alignment:** Does the abstract align with the paper's title and scope?

Overall Impression

- ☐ **Engaging:** Does the abstract make you want to read the full paper?
- ☐ **Ambition:** Is the abstract ambitious in its claims and able to justify that ambition with original insight?
- ☐ **Clear Takeaway:** Is the main contribution or insight of the research evident?

Interdisciplinary Research

Abstract Checklist

Background/Context: Does the abstract clearly set up the research topic or problem?

Research Question: Is the main aim or question of the research stated?

Reason: Is it clear why it is important to answer the question of the research?

Methods: Are the methods or approach briefly and clearly described?

Results/Findings: Are key findings summarized (even if preliminary)?

Conclusion/Implications: Does the abstract explain the significance or impact of the research?
